From the Archives: Lessons for EBM from the Field of Change Management: Getting Institutions to Accept Change (MEAM Apr-May 2010, Issue 3:5)

Editor's Note: From the Archives calls attention to past MEAM articles whose perspectives and insight remain relevant.

One of the main challenges for implementing EBM and MSP approaches is getting individuals and groups to change to a new way of doing things. Change management is a scientific field that studies why and when humans agree to alter how they do things. [Read lessons from the field of change management relevant for implementing EBM and MSP approaches.](#)
