A few more wrap-up announcements from MEAM

Don't forget to take our quick survey and enter a drawing to win a MEAM tote bag! MEAM is currently asking readers how we can improve. Help us do our job better and enter a drawing to win your very own MEAM tote bag! [Take our short survey.](#)

New (and completely free) research repository available for ocean and climate science research. A new service MarXiv (rhymes with "archive") makes it possible to share your ocean and climate science papers, technical reports, and datasets legally and at no cost to you or users. Other benefits of storing your research products on MarXiv include unique DOI numbers, long-term storage, and indexing in Google Scholar. Read more about [more about MarXiv](#) and [add papers to the repository](#).

MarXiv is also accepting applications for Ambassadors to help train researchers on how to make academic literature legally- and freely-available. MarXiv will provide \$1000 stipends to defray expenses for this work. [Applications are due by 17 December 2017.](#)

Early registration and abstract submission end December 15 for ocean climate change symposium. MEAM is going to be reporting from the [Effects of Climate Change on the World's Oceans symposium](#) being held in Washington, DC, June 4-8, 2018. The forum will bring experts from around the world together to better understand climate impacts on ocean ecosystems – and how to respond. We encourage MEAM readers to attend the conference and contribute to our coverage. Please let us know at meam@openchannels.org if you will be attending and would be interested in contributing!
